GUIDE

Deploy Desktop Application With Microsoft Endpoint Manager (Intune)

Introduction

This guide is made specifically for administrators for easier deployment and management of the Uniqkey Desktop application.

New features added to the management of the desktop application includes:

- Support of Command-line arguments, which means you can now use /qn to silently deploy Uniqkey
- Automatically installed in the x86 folder for easier deploy through GPO & Intune.

How to get started with the Desktop application

STEP 1: OPEN MICROSOFT ENDPOINT MANAGER

Microsoft Endpoint Manager a	Home >		
~	() Apps Overview		
1 Home			
📶 Dashboard			
E All services	(i) Overview		
Devices	All apps		
Apps	Monitor		
🔩 Endpoint security	By platform		
🚰 Reports	Windows		
名 Users	iOS/iPadOS		
🏂 Groups	🖵 macOS		
Tenant administration	Android		
🗙 Troubleshooting + support	Policy		

Go to Apps -> Windows -> click "Add".

STEP 2: SELECT APP TYPE

Home > Apps >

Line-of-business app

To add a custom or in-house app, upload the app's installation file. Make sure the file extension matches the app's intended platform. Intune supports the following line-of-business app platforms and extensions:

- Android (APK)
- iOS (IPA)
- macOS (.IntuneMac)
- Windows (.msi, .appx, .appxbundle, .msix, and .msixbundle)

Line-of-business app -> click "Select".

STEP 3: ADD PACKAGE FILE

Add the Uniqkey .msi file and click "Ok".
